

Scientist I / II - competitive salary & benefits package

Are you passionate about science and its application to the development of therapeutic products?

Areacor is seeking to recruit a talented scientist who is passionate about science and its application to the development of therapeutic products.

Areacor is a biopharmaceutical company transforming patient care by bringing innovative medicines to market. Through the enhancement of existing medicines using its Arestat™ technology, Areacor is developing a broad portfolio of therapies as part of its proprietary pipeline and through partnerships with leading pharmaceutical and biotech companies. Areacor's treatments for people living with chronic disease are designed to simplify patient care and improve medication adherence.

This is a hands-on role requiring expert working knowledge of a broad range of analytical techniques used in characterisation of proteins and biological molecules and/or their stability assessment. You must be confident in validating and troubleshooting analytical methods as well as a proven track record in problem solving including the ability to design experiments and analyse data/results. Interactions with our partners are key, so you will be skilled in relationship and project management and possess excellent communication skills, both written and oral.
